

Tobacco Smoke

WE ARE ALL AT RISK...

1

Tobacco smoke is the third leading cause of preventable death in this country and kills 53,000 nonsmokers every year.

2

Tobacco smoke is by far the most dangerous air pollutant most Americans ever encounter.

3

Tobacco smoke kills more people than AIDS, homicide, fires and drug abuse.

4

Tobacco smoke causes 30 times as many lung cancers as all regulated air pollutants combined.
